'**Fault tolerance Wikipedia**

December 20th, 2019 - There is a difference between fault tolerance and systems that rarely have problems For instance the Western Electric crossbar systems had failure rates of two hours per forty years and therefore were highly fault resistant But when a fault did occur they still stopped operating completely and therefore were not fault tolerant See also''*What is Fault Tolerance Creating a Fault Tolerant*

December 24th, 2019 - The objective of creating a fault tolerant system is to prevent disruptions arising from a single point of failure ensuring the high availability and business continuity of mission critical applications or systems Fault tolerant systems use backup components that automatically take the place of failed components ensuring no loss of service'
